

# smarty

## Single sign on datasheet

A white login form with a blue header containing a white person icon. The form has two input fields: the first is labeled "Login" and the second is labeled "Password". Below the fields is a blue button with the text "Log In". The form is set against a green background that resembles a book cover.

## What is SSO with Smarty?

Single sign on (SSO) with Smarty will simplify your life, supercharge your security, and make managing login access simple. With SSO, your team can log in just once using your favorite trusted identity provider (like Okta, Ping Identify, and Auth0) and instantly access all the Smarty tools they need – no extra passwords, no fuss, just pure convenience.

## Why SSO with Smarty is a game-changer

Better security without the stress

- **One login, total security:** Manage access through your identity provider (IdP), reducing weak passwords and potential breaches.
- **Extra layers of safety:** Add multi-factor authentication (MFA) for even stronger protection.
- **Quick access control:** Easily update, remove, or adjust access when someone's role changes or leaves the company.

## A better experience for your team

- **No more password chaos:** One set of credentials to rule everything Smarty.
- **Login like a pro:** A smooth, seamless experience that works across all your Smarty accounts.
- **Fewer resets, fewer headaches:** Put away the Tylenol because teams won't need constant password reset requests.

## Easier management for IT

- **Fast onboarding:** Add new hires in no time using your existing IdP.
- **All-in-one setup:** Use the same SSO setup for multiple Smarty accounts.
- **Centralized control:** Manage user roles and access all in one place.

## Built for compliance

- **Stay audit-ready:** SSO with Smarty helps you meet GDPR, [SOC 2](#), [HIPAA](#), and other regulatory requirements.

## How does SSO with Smarty work?

### 1. Enable SSO

- a. Your plan may already include SSO. If so, move to step 2.
- b. If not, contact your Account Executive, [sales](#), or [call](#).

### 2. Configure your IdP

- c. Add Smarty as a trusted app in your identity provider using OIDC or SAML 2.0.

### 3. Invite your team

- d. Set up new or Invite existing users to set up user accounts in Smarty, assign roles, and let them log in with SSO.

### 4. Enjoy the benefits

- e. Your team gets easy, secure access, and you get peace of mind.

## SSO with Smarty works with your favorite IdPs

SSO with Smarty integrates with the identity providers you already know and trust:

- Okta
- Ping Identity
- Auth0

## SSO with Smarty supports these protocols:

- OIDC (OpenID Connect)
- SAML 2.0
